1 **TABLE OF CONTENTS**

2 I. INTRODUCTION..... 1

3 II. STATEMENT OF MATERIAL FACTS..... 3

4 III. ARGUMENTS AND AUTHORITY ..... 4

5 A. The Capital Gains Tax Meets Dormant Commerce Clause Requirements ..... 4

6 1. The capital gains tax properly applies to sales of tangible property located

7 in Washington, so Plaintiffs’ facial challenge necessarily fails ..... 5

8 2. The capital gains tax properly applies to sales of intangible property ..... 6

9 a. The capital gains tax satisfies *Complete Auto’s* nexus prong ..... 7

10 b. The capital gains tax is fairly apportioned..... 9

11 c. Plaintiffs fail to show impermissible discrimination ..... 13

12 B. The Capital Gains Tax is a Valid Excise Tax, Not a Tax on Property ..... 14

13 1. Under established precedent, the capital gains tax is an excise tax, not a

14 property tax ..... 14

15 2. The capital gains tax on the voluntary sale of assets does not become a

16 property tax because other states have elected to tax capital gains

17 differently ..... 17

18 3. The capital gains tax has the “hallmarks” of an excise tax ..... 19

19 4. Stare decisis supports the State, not Plaintiffs..... 22

20 C. ESSB 5096 Does Not Violate Article I, Section 12 ..... 22

21 IV. CONCLUSION ..... 26

1 **I. INTRODUCTION**

2 Every one of Plaintiffs’ arguments challenging ESSB 5096 is demonstrably wrong under  
3 Supreme Court precedent. While Plaintiffs incorrectly claim that the State is asking the Court to  
4 reject precedent, in fact it is Plaintiffs who need this Court to ignore binding authority to prevail.  
5 The Court should faithfully apply the Constitution and precedent and uphold ESSB 5096.

6 Plaintiffs’ primary argument is that ESSB 5096 violates the dormant Commerce  
7 Clause, but their own brief refutes this claim. Plaintiffs raise a facial challenge, meaning they  
8 are asking the Court to strike down ESSB 5096 entirely, not just as applied to them. But “a  
9 facial challenge must be rejected if there are *any circumstances* where the statute can  
10 constitutionally be applied.” *Wash. State Republican Party v. Pub. Disclosure Comm’n*, 141  
11 Wn.2d 245, 282 n.14, 4 P.3d 808 (2000) (emphasis added). Plaintiffs admit that the capital  
12 gains tax can be applied consistent with the Commerce Clause to capital gains from sales of  
13 tangible property in Washington. Pls.’ Mot. Summ. J. at 8-9, 12. And of course that is right: if  
14 a Washington resident sells a yacht or painting in Washington and earns a \$1 million capital  
15 gain, there is no Commerce Clause problem with Washington taxing that transaction. Because  
16 Plaintiffs admit that the tax can be applied without violating the dormant Commerce Clause in  
17 some circumstances, their facial challenge fails.

18 Even if Plaintiffs could overcome this problem, their Commerce Clause argument  
19 would still fail. They claim that Washington cannot tax gains earned by Washington residents  
20 from the sale of intangible assets, like stocks and bonds, because the sale might technically  
21 occur elsewhere. This theory has never been accepted by any court, would invalidate the taxes  
22 imposed on capital gains by virtually every state in America, and ignores United States  
23 Supreme Court precedent holding that states have authority to tax intangible property sold or  
24 transferred by their residents. *Curry v. McCanless*, 307 U.S. 357, 59 S. Ct. 900, 83 L. Ed. 1339  
25 (1939). In reality, the capital gains excise tax—which includes a credit that prevents multiple  
26 taxation—is “internally consistent” and meets every other factor under the Court’s dormant

1 Commerce Clause test. Plaintiffs’ Commerce Clause argument fails under established  
2 precedent.

3 Plaintiffs also incorrectly argue that the tax violates article VII of the Washington  
4 Constitution. They say that because selling capital assets generates income, any tax on capital  
5 gains must be an income tax. That argument has repeatedly been rejected by our Supreme  
6 Court. Selling real estate generates income, but the retail sales tax imposed on buyers is an  
7 excise tax. Selling goods generates income for store owners, but the sales tax is an excise tax.  
8 When plumbers, carpenters, or barbers sell their services and thereby earn income, they pay the  
9 business and occupation (B&O) tax, which is, of course, an excise tax. In short, merely  
10 because a transaction generates income does not mean that a tax on that transaction is an  
11 income tax. What Plaintiffs are asking for is a special rule exempting the wealthy from taxation  
12 of voluntary transactions they commonly engage in—like selling stocks, bonds, or valuable  
13 art—while transactions that working people engage in are taxed. The Constitution provides no  
14 basis for such a rule.

15 Finally, Plaintiffs misrepresent the law in arguing that ESSB 5096 violates the  
16 Privileges and Immunities Clause of Washington’s Constitution. They assert our Supreme  
17 Court has recognized a fundamental right of Washington residents to receive any tax  
18 exemption available to any other resident. That is simply false, and would call into question tax  
19 exemptions favoring seniors and veterans, favoring rural areas, or favoring certain industries,  
20 like farming or timber. In any event, even if there were such a rule, our Supreme Court has  
21 held that the Legislature has exceptionally broad authority to draw distinctions in creating tax  
22 policies and has upheld taxes and tax exemptions that apply to some but not others. Plaintiffs’  
23 contrary claim is untenable.

24 In short, binding precedent refutes every one of Plaintiffs’ arguments. The Court should  
25 grant summary judgment to the State and reject Plaintiffs’ facial challenge to ESSB 5096.  
26

1 **II. STATEMENT OF MATERIAL FACTS**

2 The material facts are discussed in the State’s motion for summary judgment.  
3 Plaintiffs’ motion, by contrast, includes no facts or evidence about how the capital gains tax  
4 will affect them. They do not provide a single example of a transaction they have engaged in,  
5 refrained from engaging in, or wish to engage in that would be subject to the tax, and none  
6 provides evidence that they will actually be subject to the tax. Instead, Plaintiffs focus  
7 primarily on arguing that “income taxes” are unpopular in Washington. *See* Pls.’ Mot. Summ.  
8 J. at 3. But the capital gains tax is not an income tax, and its constitutionality does not depend  
9 on whether Plaintiffs personally agree with it. Under the Constitution, what matters is that  
10 ESSB 5096 (codified in Chapter 82.87 RCW) was enacted by a majority vote of our elected  
11 legislative leaders, signed into law by the Governor, and advances legitimate policy goals,  
12 including funding public education and making the state’s tax code less regressive. For that  
13 reason, the Court may invalidate the tax only if Plaintiffs prove that there is no “reasonable  
14 doubt that the statute violates the constitution.” *Amalgamated Transit Union Local 587 v.*  
15 *State*, 142 Wn.2d 183, 205, 11 P.3d 762 (2000). “It is not the function of [the courts] . . . to  
16 consider the propriety of the tax, or to seek for the motives or to criticize the public policy  
17 which may have prompted adoption of the legislation.” *State ex rel. Namer Inv. Corp. v.*  
18 *Williams*, 73 Wn.2d 1, 7, 435 P.2d 975 (1968) (citation omitted).

19 The State has already described in detail the operation of the tax, State’s Mot. Summ. J.  
20 at 2-4, and will not repeat that description here, except to say that the Legislature created a  
21 detailed allocation process to avoid taxing capital gains that are attributable to another state.  
22 RCW 82.87.100. In general, the law allocates to Washington long term capital gains from the  
23 sale or exchange of tangible property located in Washington and intangible property owned by  
24 an individual domiciled in the state. *Id.* Additionally, all taxpayers are allowed a credit “equal  
25 to the amount of any legally imposed income or excise tax paid . . . to another taxing  
26 jurisdiction on capital gains derived from capital assets within the other taxing jurisdiction . . .

1 .” RCW 82.87.100(2)(a). These provisions ensure that capital gains will be taxed only when  
2 there is a constitutional nexus with Washington and no other state is lawfully taxing the same  
3 gains.

### 4 III. ARGUMENTS AND AUTHORITY

5 No Plaintiff has paid the capital gains tax, and none has shown an existing, non-  
6 speculative injury. Accordingly, this Court should dismiss Plaintiffs’ complaints for lack of  
7 standing alone. *See State’s Mot. Summ. J.* at 6-8. But even if Plaintiffs could establish standing,  
8 their constitutional claims would fail under established precedent. The capital gains tax easily  
9 satisfies dormant Commerce Clause requirements, is not a property tax subject to article VII, and  
10 does not violate the Privileges and Immunities Clause. Plaintiffs’ challenge fails at every turn.

#### 11 A. The Capital Gains Tax Meets Dormant Commerce Clause Requirements

12 Plaintiffs begin their quest to invalidate the capital gains tax by invoking the dormant  
13 Commerce Clause. A state tax satisfies the dormant Commerce Clause if it (1) applies to an  
14 activity with a substantial nexus with the taxing state, (2) is fairly apportioned, (3) does not  
15 impermissibly discriminate against interstate commerce, and (4) is fairly related to services  
16 provided by the state. *Wash. Bankers Ass’n v. State*, 198 Wn.2d 418, 429, 495 P.3d 808 (2021)  
17 (citing *Complete Auto Transit, Inc. v. Brady*, 430 U.S. 274, 279, 97 S. Ct. 1076, 51 L. Ed. 2d  
18 326 (1977)). Plaintiffs contend that the capital gains tax fails the first three elements of this test  
19 because it “impermissibly allocates the tax to Washington based on the taxpayer’s location  
20 instead of where the activity of sale or transfer of the asset occurs, imposes a tax that is not  
21 fairly apportioned to activities occurring within the state, and discriminates against interstate  
22 commerce.” *Pls.’ Mot. Summ. J.* at 7-8.

23 Plaintiffs are wrong on all counts. First, Plaintiffs concede, as they must, that the  
24 dormant Commerce Clause does not preclude applying ESSB 5096 to the sale of tangible  
25 property located in the state. *Id.* at 8-9, 12. Because they concede that the tax can  
26 constitutionally be applied in some circumstances, their facial challenge fails. But even setting

1 that aside, Plaintiffs are simply wrong in arguing that Washington lacks nexus to tax sales by  
2 Washington residents. Nor can Plaintiffs show any violation of the fair apportionment or  
3 discrimination prongs. The Court should reject their dormant Commerce Clause claim.

4 **1. The capital gains tax properly applies to sales of tangible property located**  
5 **in Washington, so Plaintiffs’ facial challenge necessarily fails**

6 Plaintiffs do not and cannot argue that Washington is powerless to tax gains derived  
7 from the sale of tangible personal property located in the state. *See Okla. Tax Comm’n v.*  
8 *Jefferson Lines, Inc.*, 514 U.S. 175, 184, 115 S. Ct. 1331, 131 L. Ed. 2d 261 (1995) (“It has  
9 long been settled that a sale of tangible goods has a sufficient nexus to the State in which the  
10 sale is consummated to be treated as a local transaction taxable by that State.”). Plaintiffs  
11 correctly concede this issue. Pls.’ Mot. Summ. J. at 9-10 (conceding that Washington has  
12 nexus to tax, quoting *South Dakota v. Wayfair, Inc.*, \_\_\_ U.S. \_\_\_, 138 S. Ct. 2080, 201 L. Ed.  
13 2d 403 (2018)); *id.* at 12 (conceding that the tax fairly apportions gains from the sale of  
14 tangible property located in the state, citing *Jefferson Lines*).

15 That concession is fatal to Plaintiffs’ dormant Commerce Clause claim. Plaintiffs are  
16 challenging the law facially, not “as applied.” Pls.’ Mot. Summ. J. at 1. A facial challenge is  
17 “the most difficult challenge to mount successfully, since the challenger must establish that no  
18 set of circumstances exists under which the Act would be valid.” *United State v. Salerno*, 481  
19 U.S. 739, 754, 107 S. Ct. 2095, 95 L. Ed. 2d 697 (1987); *see also City of Redmond v. Moore*,  
20 151 Wn.2d 664, 669, 91 P.3d 875 (2004) (“a successful facial challenge is one where no set of  
21 circumstances exists in which the statute . . . can be constitutionally applied”). Here, Plaintiffs  
22 concede that the statute can be applied in some circumstances without violating the dormant  
23 Commerce Clause, so their effort to invalidate ESSB 5096 fails.

24 When a duly enacted law is challenged on its face, the court must, whenever possible,  
25 construe it “so as to uphold its constitutionality.” *In re Detention of Danforth*, 173 Wn.2d 59,  
26 70, 264 P.3d 783 (2011) (quoting *State v. Reyes*, 104 Wn.2d 35, 41, 700 P.2d 1155 (1985)).

1 Plaintiffs advocate for the exact opposite approach, pointing to a limited circumstance where  
2 the tax might not constitutionally apply because the owner of tangible assets has removed the  
3 property from the state prior to its sale. Pls.’ Mot. Summ. J. at 8 (citing *Curry*, 307 U.S. at 363-  
4 64, which holds that *tangible property* is taxable by the state where it is physically located).  
5 But Plaintiffs do not know, and cannot show in this facial challenge, whether that circumstance  
6 will ever arise. This is so because ESSB 5096 expressly excludes from the tax “[a]mounts that  
7 the state is prohibited from taxing under the Constitution of the state or the Constitution or  
8 laws of the United States.” RCW 82.87.060(2). The Legislature modeled this provision after a  
9 similar provision in the B&O excise tax code, *see* RCW 82.04.4286, and it provides the  
10 Department of Revenue with authority to apply the tax as constitutionally required. Thus, even  
11 if the hypothetical scenario comes to pass that a Washington resident removes tangible assets  
12 from the state before selling them at a capital gain exceeding \$250,000, and even if Plaintiffs  
13 are right that under the specific circumstances of that transaction the state could not  
14 constitutionally apply its tax, RCW 82.87.060(2) would require the Department not to apply  
15 the tax in that specific situation. If the Department ever sought to tax such a transaction, a  
16 taxpayer could bring an as-applied challenge at that time. But that hypothetical possibility  
17 provides no basis to strike down the entire statute. *See Woods v. Seattle’s Union Gospel*  
18 *Mission*, 197 Wn.2d 231, 240, 481 P.3d 1060 (2021) (“When determining whether a law is  
19 facially invalid, courts must be careful not to exceed the facial requirements and speculate  
20 about hypothetical cases.”) (citation omitted).

21 In sum, Washington is constitutionally permitted to impose the capital gains excise tax  
22 on the sale of tangible property located in the state, as Plaintiffs concede. Because ESSB 5096  
23 can constitutionally apply in this circumstance, Plaintiffs’ facial challenge fails.

## 24 **2. The capital gains tax properly applies to sales of intangible property**

25 Even if Plaintiffs could overcome the concession discussed above, their dormant  
26 Commerce Clause argument still fails because ESSB 5096 may constitutionally apply to gains

1 earned by Washington residents from the sale of intangible assets, like stocks and bonds.  
2 Plaintiffs' claim to the contrary misstates the law and is entirely meritless.

3 **a. The capital gains tax satisfies *Complete Auto's* nexus prong**

4 Plaintiffs first claim ESSB 5096 violates the dormant Commerce Clause because it  
5 allocates gains to Washington that are not derived from activity with a nexus to the state.  
6 Pls.' Mot. Summ. J. at 9. But Plaintiffs' claim is built on the false premise that intangible  
7 property owned by persons domiciled in the state is "located" outside the state. Building on  
8 this erroneous premise, they contend that Washington is powerless to tax amounts derived  
9 from the sale of intangible property by persons domiciled in the state. *Id.* at 9. Under their  
10 misguided narrative, the dormant Commerce Clause precludes Washington from taxing the  
11 "'sale or exchange' of certain long-term capital assets simply because the assets' owners are  
12 residents of or domiciled in Washington . . . ." *Id.* This claim finds no support under  
13 established law, which treats the sale of intangibles as occurring at the place where the owner  
14 is domiciled.

15 The Legislature intentionally used the term "domicile" in RCW 82.87.100(1)(b).  
16 "Domicile" is not synonymous with "residence." *Sasse v. Sasse*, 41 Wn.2d 363, 365, 249 P.2d  
17 380 (1952). Every natural person has a domicile, and there is a "settled legal relation" between  
18 the person and his or her chosen domicile. *Id.* at 366. Once established, a person's domicile  
19 "continues until it is superseded by a new domicile." *Id.* Consequently, a person can have only  
20 one domicile at a time. *In re Lassin's Estate*, 33 Wn.2d 163, 165, 204 P.2d 1071 (1949). The  
21 term "residence" carries a different connotation, as a person "may have more than one  
22 residence at the same time, but only one domicile." 28 C.J.S. Domicile § 5 (Nov. 2021)  
23 (footnotes omitted).

24 Domicile is important in the tax context because intangible personal property is treated  
25 as "located" in the state of the owner's domicile. *Greenough v. Tax Assessor of City of*  
26 *Newport*, 331 U.S. 486, 492-93, 67 S. Ct. 1400, 91 L. Ed. 1621 (1947); *In re Eilermann's*

1 *Estate*, 179 Wash. 15, 18, 35 P.2d 763 (1934). Consequently, states have broad authority to  
2 impose taxes on the sale or transfer of intangible property owned by a person domiciled in the  
3 state. *Curry v. McCannless*, 307 U.S. at 366. The power to sell or dispose of intangible property  
4 “is the appropriate subject of taxation at the place of domicile of the owner of the power.”  
5 *Graves v. Elliott*, 307 U.S. 383, 386, 59 S. Ct. 913, 83 L. Ed. 1356 (1939). Thus, to the extent  
6 Plaintiffs argue that Washington has no authority to impose a capital gains tax on the sale or  
7 transfer of intangible property because the property is “located” elsewhere, they are plainly  
8 wrong under binding precedent. *See, e.g., Curry* 307 U.S. at 366 (the sovereign taxing power  
9 of the state extends to intangible property of a domiciled resident even though the intangible  
10 has “no physical location within its territory”); *In re Grady’s Estate*, 79 Wn.2d 41, 43, 483  
11 P.2d 114 (1971) (citing *Curry* for the proposition that intangibles have their “situs at the  
12 domicile of the owner”); *In re Plasterer’s Estate*, 49 Wn.2d 339, 342, 301 P.2d 539 (1956)  
13 (citing *Curry* as support for upholding inheritance tax imposed on intangible property of a  
14 Washington domiciliary).

15 Plaintiffs also theorize that the capital gains tax lacks a nexus to Washington because  
16 certain asset sales that could be included in the Washington tax allegedly “occur[] outside its  
17 borders.” Pls.’ Mot. Summ. J. at 8. But as just explained, United States Supreme Court  
18 precedent makes clear that any sales of *intangible* property owned by persons domiciled in  
19 Washington are treated as occurring in Washington. And Plaintiffs concede that all sales of  
20 *tangible* property located in Washington have a sufficient nexus to the State. That leaves only  
21 Plaintiffs’ hypothetical claim that the tax might be applied to certain sales of tangible property  
22 that occur outside of Washington. Plaintiffs offer no evidence that the State has attempted to  
23 tax such a transaction, and if the State ever did, a taxpayer could argue a lack of nexus as to  
24 that transaction at that time. The theoretical possibility that the State might seek to tax such a  
25 transaction provides no basis to invalidate the tax.

1                   **b.       The capital gains tax is fairly apportioned**

2           The central purpose of the fair apportionment requirement “is to ensure that each State  
3 taxes only its fair share of an interstate transaction.” *Goldberg v. Sweet*, 488 U.S. 252, 260-61,  
4 109 S. Ct. 582, 102 L. Ed. 2d 607 (1989). Consistent with that purpose, the Constitution  
5 “imposes no single [apportionment] formula on the States” and instead evaluates a state’s  
6 apportionment method “by examining whether it is internally and externally consistent.” *Id.* at  
7 261 (citations omitted). Internal consistency requires a tax to be structured so that if every state  
8 imposed it, no multiple taxation would result. *Id.* In contrast, the external consistency test  
9 evaluates the “economic justification for the State’s claim upon the value taxed.” *Jefferson*  
10 *Lines*, 514 U.S. at 185. Here, the capital gains tax meets both requirements. *See State’s Mot.*  
11 *Summ. J.* at 22-23.

12           Plaintiffs admit that the capital gains tax is internally consistent. *See Pls.’ Mot. Summ.*  
13 *J.* at 12 n.8, 13.<sup>1</sup> They claim, however, that the tax lacks external consistency based on their  
14 view that Washington is reaching beyond the portion of value that is fairly attributed to  
15 economic activity within the state. *Id.* at 12. They further claim that the “risk of multiple  
16 taxation” is evidence of such overreach. *Id.* at 13. For multiple reasons, these arguments fail.

17           First, as explained above, Plaintiffs’ claim is built on the false premise that intangible  
18 property owned by persons domiciled in the state is “located” outside the state. In reality,  
19 binding precedent makes clear that intangible personal property is treated as “located” in the  
20 state of the owner’s domicile. *Greenough*, 331 U.S. at 492-93; *Eilermann’s Estate*, 179 Wash.  
21 at 18. And our Supreme Court has held that amounts derived from the sale of property located  
22 in Washington are “inherently apportioned” to the state without the need for any further  
23

---

24           <sup>1</sup> Indeed, Washington’s capital gains tax easily satisfies internal consistency because the tax credit in  
25 RCW 82.87.100(2)(a) ensures multiple state taxes would not overlap in a hypothetical world where every state  
26 has copied Washington’s tax system. *See Goldberg*, 488 U.S. at 264 (Illinois excise tax on full value of interstate  
telecommunication originating in the state satisfied the fair apportionment requirement as “the credit provision”  
contained in the state’s tax “operates to avoid actual multiple taxation”).

1 division. *Chicago Bridge & Iron Co. v. Dep't of Revenue*, 98 Wn.2d 814, 830, 659 P.2d 463  
2 (1983). That holding is supported by controlling federal authority, most notably *Jefferson*  
3 *Lines*. There, the Supreme Court rejected the taxpayer's claim that Oklahoma could not tax the  
4 entire amount earned from the in-state sale of an interstate bus ticket, holding that the dormant  
5 Commerce Clause did not require the state to divide the proceeds among all states where the  
6 purchaser would travel. *Jefferson Lines*, 514 U.S. at 186. To the contrary, the Court had  
7 "consistently approved taxation of sales without any division of the tax base among different  
8 States." *Id.* This was proper because a sale of goods is "most readily viewed as a discrete event  
9 facilitated by the laws and amenities of the place of sale." *Id.* Consequently, the state where the  
10 sale occurs may properly tax the full amount of the transaction. *Id.*; see also *Tyler Pipe Indus.*  
11 *Inc. v. Dep't of Revenue*, 483 U.S. 232, 251, 107 S. Ct. 2810, 97 L. Ed. 2d 199 (1987)  
12 (Washington tax imposed on the full value of sales within the state satisfies fair apportionment  
13 requirement because the activity is "conducted wholly within Washington"); *Gen. Motors*  
14 *Corp. v. City of Seattle*, 107 Wn. App. 42, 60, 25 P.3d 1022 (2001) (city's B&O tax on full  
15 value of sales occurring therein was properly apportioned).<sup>2</sup>

16 Moreover, our Supreme Court has expressly rejected the claim that Washington's B&O  
17 tax imposed on the sale of property within the state must be apportioned by a statutory formula,  
18 calling the argument "[m]eritless" and contrary to settled law. *W.R. Grace & Co. v. Dep't of*  
19 *Revenue*, 137 Wn.2d 580, 596, 973 P.2d 1011 (1999). Plaintiffs can cite no authority  
20 suggesting that a different rule should apply to the capital gains tax. In sum, it is settled that the  
21  
22

---

23 <sup>2</sup> States imposing broad-based corporate net income taxes have long used a system called formulary  
24 apportionment to determine how much of a multistate businesses' profits can be attributed to and taxed by a state.  
25 See, e.g., *Container Corp. of Am. v. Franchise Tax Bd.*, 463 U.S. 159, 103 S. Ct. 2933, 77 L. Ed. 2d 545 (1983)  
26 (discussing with approval California's approach to dividing the income of a multinational corporation using a  
three-factor formula). But states are not constitutionally required to use a formula to apportion amounts derived  
from the sale of property. This is well-settled law. *Jefferson Lines*, 514 U.S. at 186; *Chicago Bridge*, 98 Wn.2d at  
830.

1 state may tax the full value of sales or transfers of property, tangible and intangible, located  
2 within its borders.

3 Additionally, no genuine risk of multiple state taxation exists under the capital gains tax  
4 statutes because Washington provides a credit for taxes lawfully paid to another state.

5 RCW 82.87.100(2)(a). Consequently, if another state has jurisdiction to tax the sale of property  
6 because it has a situs in both Washington and that other state, Washington will give up its tax.

7 *Id.* Providing a credit for taxes paid to another state is a common and accepted method of  
8 avoiding dormant Commerce Clause concerns. *D.H. Holmes Co., Ltd. v. McNamara*, 486 U.S.  
9 24, 31, 108, S. Ct. 1619, 100 L. Ed. 2d 21 (1988); *Steiner v. Utah State Tax Comm’n*, 449 P.3d  
10 189, 194 (Ut. 2019), *cert. denied* 140 S. Ct. 1114 (2020). Importantly, Plaintiffs cite no case in  
11 which a court has invalidated a state tax imposed on the sale of intangible property by a person  
12 domiciled in the state where, as here, the tax includes a credit mechanism that ensures the sale  
13 will be taxed by only one state.

14 Plaintiffs rely heavily on *Comptroller of Treasury of Maryland v. Wynne*, 575 U.S. 542,  
15 135 S. Ct. 1787, 191 L. Ed. 2d 813 (2015). But that case supports the State’s position, not  
16 Plaintiffs’. To begin with, *Wynne* invalidated Maryland’s tax based solely on the tax failing the  
17 “internal consistency” test, *id.* at 561-69, a test that Plaintiffs concede is satisfied here,  
18 Pls.’ Mot. Summ. J. at 12 n.8, 13. The Court never applied the “external consistency” test  
19 relied on by Plaintiffs here, but even if it had, the Maryland tax is obviously and crucially  
20 different from Washington’s capital gains excise tax.

21 In *Wynne*, Maryland imposed an individual income tax composed of two parts, “a  
22 ‘state’ income tax . . . and a so-called ‘county’ income tax.” *Id.* at 545-46. The “state” tax  
23 included a credit for taxes paid to other states, while the “county” tax did not. *Id.* at 546.  
24 Characterizing the Maryland tax system as “unusual,” *id.* at 545 and 556, the Supreme Court  
25 held that it lacked “internal consistency” because, without a credit for both the state tax and the  
26 “so-called county tax” (which was imposed by the state and amounted to an additional state-

1 level tax), two states could tax a Maryland resident’s income from engaging in interstate  
2 commerce. *Id.* at 565. The Court did not suggest that state taxes that provide a full credit, like  
3 ESSB 5096 does, are constitutionally suspect. Rather, the Court said just the opposite: “To be  
4 sure, Maryland could remedy the infirmity in its tax scheme by offering, as most States do, a  
5 credit against income taxes paid to other States. If it did, Maryland’s tax scheme would survive  
6 the internal consistency test and would not be inherently discriminatory.” *Id.* at 568.

7 Plaintiffs conveniently ignore the obvious distinction between the type of tax at issue in  
8 *Wynne* (allowing no credit against Maryland’s “county” tax) and tax systems that allow a full  
9 credit for taxes paid on amounts that another state has taxed. As an example of the latter type  
10 of tax, the Utah Supreme Court in *Steiner* upheld a single tax on income earned by Utah  
11 residents that provided a credit for income taxes paid to other states on the same income. 449  
12 P.3d at 194, 197. The Court held that “Utah’s provision of credits for income taxes already  
13 paid to other states satisfies the dormant commerce requirements set forth in controlling  
14 precedent.” *Id.* at 194 (footnote omitted). Specifically, “[t]his arrangement satisfies *Wynne*’s  
15 internal consistency test” because the credit mechanism prevents persons earning income  
16 outside the state from “shoulder[ing] a higher tax burden.” *Id.* (footnote omitted).

17 The same is true of the credit provided in the Washington capital gains tax because it  
18 prevents Washington and another state from imposing taxes on the same capital gains. RCW  
19 82.87.100(2)(a). This arrangement satisfies *Complete Auto*’s fair apportionment requirement  
20 under controlling law. *See D.H. Holmes*, 486 U.S. at 31 (“We have no doubt that the second  
21 and third elements of the [*Complete Auto*] test are satisfied. The Louisiana tax scheme is fairly  
22 apportioned, for it provides a credit against its use tax for sales taxes that have been paid in  
23 other States.”); *Goldberg*, 488 U.S. at 264 (Illinois excise tax satisfied fair apportionment  
24 requirement as “the credit provision” contained in the law “operates to avoid actual multiple  
25 taxation”).

1 In sum, the capital gains tax easily satisfies “principles of apportionment,” as  
2 demonstrated by *Jefferson Lines*, *Chicago Bridge*, *W.R. Grace*, and the other controlling  
3 authorities discussed above. As those authorities confirm, amounts derived from in-state sales  
4 are “inherently apportioned” to the state. And both the United States Supreme Court and our  
5 Supreme Court have made clear that Washington has full authority to tax sales of intangible  
6 property by persons domiciled in Washington. *See, e.g., Curry* 307 U.S. at 366 (the sovereign  
7 taxing power of the state extends to intangible property of a domiciled resident even though the  
8 intangible has “no physical location within its territory”); *In re Grady’s Estate*, 79 Wn.2d 41,  
9 43, 483 P.2d 114 (1971) (citing *Curry* for the proposition that intangibles have their “situs at  
10 the domicile of the owner”); *In re Plasterer’s Estate*, 49 Wn.2d 339, 342, 301 P.2d 539 (1956)  
11 (citing *Curry* as support for upholding inheritance tax imposed on intangible property of a  
12 Washington domiciliary). Additionally, the credit provided in RCW 82.87.100(2)(a) ensures no  
13 genuine risk of multiple state taxation, consistent with established “principles of  
14 apportionment.” Thus, the cited cases demonstrate that dividing the tax base with other states is  
15 not required.

16 **c. Plaintiffs fail to show impermissible discrimination**

17 Plaintiffs also assert, without argument, that the capital gains tax fails the  
18 discrimination prong of the *Complete Auto* test. Pls.’ Mot. Summ. J. at 8. Our Supreme Court  
19 recently addressed this prong in *Washington Bankers*, explaining that “discrimination” under  
20 *Complete Auto* means ““differential treatment of in-state and out-of-state economic interests  
21 that benefits the former and burdens the latter.”” *Wash. Bankers*, 198 W.2d at 430 (quoting  
22 *Filo Foods, LLC v. City of SeaTac*, 183 Wn.2d 770, 809, 357 P.3d 1040 (2015)). Plaintiffs  
23 offer no cogent argument that the tax discriminates against interstate commerce. Consequently,  
24 the claim fails. *See id.* at 439 (“discrimination requires more than mere assertion that it  
25 exists”).  
26

1 In sum, Plaintiffs’ facial challenge under the dormant Commerce Clause fails at every  
2 turn. Properly analyzed, the capital gains tax satisfies all dormant Commerce Clause  
3 constraints and should be upheld.

4 **B. The Capital Gains Tax is a Valid Excise Tax, Not a Tax on Property**

5 Plaintiffs argue that the capital gains tax is a tax on income, which Plaintiffs then assert  
6 is a type of property tax subject to the uniformity and levy limit requirements of article VII,  
7 sections 1 and 2. Their argument fails under established law.

8 **1. Under established precedent, the capital gains tax is an excise tax, not a  
9 property tax**

10 As Plaintiffs concede, article VII, sections 1 and 2 apply only to property taxes.  
11 Pls.’ Mot. Summ. J. at 22. This is settled law. *In re Estate of Hambleton*, 181 Wn.2d 802, 832,  
12 335 P.3d 398 (2014) (article VII, section 1 “applies only to property tax and not excise tax”);  
13 *High Tide Seafoods v. State*, 106 Wn.2d 695, 725 P.2d 411 (1986); *see also St. Paul & Tacoma*  
14 *Lumber Co. v. State*, 40 Wn.2d 347, 354, 243 P.2d 474 (1952) (timber company’s contention  
15 that tax imposed on its use of wood products was a property tax “is patently specious”). Thus,  
16 any challenge to a tax based on article VII involves a key threshold question: is the challenged  
17 tax a property tax? If the answer is no, the analysis ends. *Cosro, Inc. v. Liquor Control Bd.*, 107  
18 Wn.2d 754, 761, 733 P.2d 539 (1987).

19 Plaintiffs cannot meet this threshold requirement because the capital gains tax is not a  
20 property tax under binding Washington Supreme Court precedent. For at least 85 years, the  
21 Court has defined a property tax as “‘a tax which falls upon the owner *merely because he is*  
22 *owner*, regardless of the use or disposition made of his property.’” *Morrow v. Henneford*, 182  
23 Wash. 625, 631, 47 P.2d 1016 (1935) (emphasis added) (quoting *Bromley v. McCaughn*, 280  
24 U.S. 124, 137, 50 S. Ct. 46, 74 L. Ed. 226 (1929)). By contrast, a tax that applies to the sale,  
25 transfer, or use of property is an excise tax, not a property tax. *Id.* at 630. Thus, Washington  
26 distinguishes between a tax on the mere ownership of property and a tax on selling,

1 transferring, or otherwise exercising power over property. Perhaps the most relevant case  
2 applying this principle is *Mahler v. Tremper*, 40 Wn.2d 405, 243 P.2d 627 (1952). There, the  
3 Court unanimously upheld the constitutionality of the real estate excise tax, which it deemed  
4 an excise tax on the sale of real estate. *See id.* at 407. The Court held the tax was not a property  
5 tax because “a tax upon the sale of property is not a tax *upon the subject matter of that sale.*”  
6 *Id.* at 409 (emphasis added). Instead, the real estate excise tax—which applies to sales of real  
7 property—applied “upon the act or incidence of transfer. The imposition relates to an exercise  
8 of one of several rights in and to property. Imposition is not upon each and every owner merely  
9 because he is the owner of the property involved.” *Id.* at 410.

10 Numerous cases have applied this same principle. *See State’s Mot. Summ. J.* at 10-15  
11 (discussing cases). In the 1990s, the Court distilled this principle into a simple test: A property  
12 tax is an “absolute and unavoidable demand against property or the ownership of property” that  
13 arises merely from the taxpayer’s “status as property owner[.]” *Covell v. City of Seattle*, 127  
14 Wn.2d 874, 890, 905 P.2d 324 (1995), *abrogated on other grounds by Yim v. City of Seattle*,  
15 194 Wn.2d 682, 451 P.3d 694 (2019). In contrast, an excise tax ““is based upon the voluntary  
16 action of the person taxed in performing the act, enjoying the privilege or engaging in the  
17 occupation which is the subject of the excise, and the element of absolute and unavoidable  
18 demand, as in the case of a property tax, is lacking.”” *Black v. State*, 67 Wn.2d 97, 99, 406 P.2d  
19 761 (1965) (quoting 1 Cooley, *Taxation* § 46, at 132 (4th ed. 1924)).

20 Under the above test, the capital gains tax is not a property tax. It is neither absolute nor  
21 unavoidable as it applies only upon voluntary sales of long-term capital assets. Consequently,  
22 the limitations in article VII do not apply.

23 Plaintiffs make no effort to address the analysis our Supreme Court has applied for the  
24 past 85 years. They do not even cite *Morrow*, *Mahler*, *Black*, *Covell*, or other cases in which  
25 the Court carefully analyzed whether a challenged tax was an “absolute and unavoidable  
26 demand against property.” Instead, they primarily rely on fractured decisions in *Culliton v.*

1 *Chase*, 174 Wash. 363, 25 P.2d 81 (1933), and *Jensen v. Henneford*, 185 Wash. 209, 212, 53  
2 P.2d 607 (1936). *See* Pls.’ Mot. Summ. J. at 17-18.<sup>3</sup> But these cases involved annual net  
3 income taxes that applied broadly to all amounts received during the tax year, and not just  
4 amounts derived from sales of property—which the Court has consistently upheld as valid  
5 excise taxes. *See Morrow*, 182 Wash. 625 (tax on sales of personal property is an excise tax);  
6 *Mahler*, 40 Wn.2d 405 (tax on sales of real property is an excise tax). Neither case held that a  
7 tax on the *sale or transfer of property* is a tax on the property itself. In fact, when our Supreme  
8 Court decided *Culliton* and *Jensen* in the early 1930s, it had already concluded that a tax on the  
9 sale of property is an excise tax, not a tax on the property itself. *See Standard Oil Co. v.*  
10 *Graves*, 94 Wash. 291, 306, 162 P. 558 (1917), *rev. on other grounds*, 249 U.S. 389, 39 S. Ct.  
11 320, 63 L. Ed. 662 (1919) (oil inspection fee imposed “only upon the contingency that the oil  
12 is sold or offered for sale” is an excise tax). Neither *Culliton* nor *Jensen* called into question  
13 that prior precedent. And numerous cases decided after *Culliton* and *Jensen* followed this  
14 uninterrupted principle that a tax on the sale or transfer of property is an excise tax.

15 Plaintiffs’ only other argument is a simplistic and deeply flawed syllogism. They say  
16 that capital gains are income, and income taxes are property taxes, therefore capital gains taxes  
17 must be property taxes. Pls.’ Mot. Summ. J. at 15. But this argument is obviously wrong under  
18 Supreme Court precedent. Many types of transactions generate income, from a shopkeeper  
19 selling goods to a carpenter selling services to a property owner selling a building. But that  
20 does not mean that a tax on these transactions is an income tax. To give an obvious example,  
21 nearly every small business owner in the state, from carpenters to plumbers to hairdressers,  
22 pays B&O tax on their gross revenue, even though that revenue is undeniably income. Yet the  
23 Supreme Court has long held that the B&O tax is an excise tax. *See State ex rel. Stiner v. Yelle*,

24 <sup>3</sup> The “majority” in *Culliton* consisted of a two-member lead opinion authored by Justice Holcomb, a  
25 two-member concurring opinion authored by Justice Mitchell, and a concurring opinion from Justice Steinert. In  
26 *Jensen*, Justice Steinart authored a four-justice plurality opinion and Justice Millard concurred solely on *stare*  
*decisis* grounds. 185 Wash. at 225.

1 174 Wash. 402, 407, 25 P.2d 91 (1933) (in upholding the B&O tax against an article VII  
2 challenge, the Court explained that merely because “the amount of the tax is measured by the  
3 amount of . . . income [received] in no way affects” its proper classification as an excise tax).  
4 Similarly, a property owner may earn significant income from selling a piece of property, yet  
5 the real estate excise tax applying to that sale is still an excise tax. *Mahler*, 40 Wn.2d at 409-  
6 10. Plaintiffs essentially ask this Court to ignore all of this precedent, with the outcome that  
7 rich people who generate significant income from selling stocks and bonds would get a special  
8 rule exempting them from being taxed on these voluntary transactions. There is no support for  
9 such a ruling.

10 In short, the capital gains tax is an excise tax under controlling Washington authority  
11 and thus is not subject to article VII’s limits on property taxes. Plaintiffs’ claim to the contrary  
12 is “patently specious.” *St. Paul & Tacoma Lumber Co.*, 40 Wn.2d at 354.

13 **2. The capital gains tax on the voluntary sale of assets does not become a**  
14 **property tax because other states have elected to tax capital gains**  
15 **differently**

16 Because Plaintiffs cannot possibly prevail under the reasoning and legal principles  
17 established by our Supreme Court, they offer a new test. They contend the capital gains tax  
18 must be an income tax because that is how the federal government and most states have elected  
19 to tax capital gains. Pls.’ Mot. Summ. J. at 17, 19-20. This argument fails on two levels.

20 First, whether the capital gains excise tax is a property tax under Washington’s  
21 Constitution is a matter of Washington law, not an issue determined by the vagaries of other  
22 jurisdictions’ tax laws. As explained above, a tax on the voluntary sale of capital assets is an  
23 excise tax under controlling Washington law. And the Legislature justifiably followed  
24 Washington law when enacting ESSB 5096.

25 Second, if Plaintiffs were correct that federal law or the law of other states was  
26 controlling, they would lose, because case law from those jurisdictions shows that they would  
uniformly reject Plaintiffs’ claim that capital gains taxes are property taxes. Plaintiffs’

1 argument, which is based entirely on non-judicial statements, Pls.’ Mot. Summ. J. at 20 (citing  
2 Mercier Decl.),<sup>4</sup> skips the key question: is the capital gains tax a “tax on property” under article  
3 VII? They assert that Washington’s capital gains tax cannot be an excise tax because most  
4 states treat capital gains taxes as income taxes. What they ignore is that the federal government  
5 and the same other states they rely on so fervently *treat income taxes as excise taxes*.

6 As the United States Supreme Court noted in the late 1930s, the vast majority of states  
7 have expressly held that an income tax is a form of excise tax, not a property tax. *Hale v. Iowa*  
8 *State Bd. of Assessment & Revenue*, 302 U.S. 95, 104 n.7, 58 S. Ct. 102, 82 L. Ed. 72 (1937).  
9 The Court also explained that “decisions of our own court . . . [support] the classification of a  
10 tax upon net income as something different from a property tax.” *Id.* at 105-06 (citations  
11 omitted). Since the 1930s, even more states have expressly held that an income tax is a form of  
12 excise tax, not a property tax. *See Dooley v. City of Detroit*, 121 N.W.2d 724, 728 (Mich.  
13 1963) (citing cases); *see also Thorpe v. Mahin*, 250 N.E.2d 633, 635 (Ill. 1969) (“We have  
14 reviewed the many State cases dealing with this question and find the weight of authority to be  
15 that an income tax is not a property tax.”). If the legal reasoning of our Sister States and the  
16 United States Supreme Court is applied, the logical conclusion would be that income taxes are  
17 not property taxes. Thus, even if Plaintiffs were correct that the capital gains tax is an income  
18 tax under Washington law (which it is not), the capital gains tax still would not be a property  
19 tax subject to article VII.<sup>5</sup>

---

21 <sup>4</sup> Plaintiffs generally rely on the Mercier declaration for their statements of out-of-state “authority.” But  
22 the Mercier declaration consists of collected correspondence with various non-judicial state and federal employees  
23 across the country, all of which are inadmissible hearsay. “A court cannot consider inadmissible evidence when  
ruling on a motion for summary judgment.” *Dunlap v. Wayne*, 105 Wn.2d 529, 535, 716 P.2d 842 (1986).  
Defendants move to strike the Mercier declaration and its exhibits in their entirety.

24 <sup>5</sup> The overwhelming weight of authority holding that an income tax is a form of excise tax shows how  
25 misleading it is to ask other states and the federal government whether a tax on capital gains is an income tax or  
26 an excise tax. *See* Pls.’ Mot. Summ. J. at 20. There simply is no substantive distinction within those jurisdictions  
between an income tax and an excise tax. A more telling question would be to ask other states and the federal  
government whether they consider a tax on capital gains to be a *property tax*. The State is unaware of any federal  
or state authority supporting the idea that a tax on capital gains is a type of property tax.

1 The Court need not follow Plaintiffs down their “other jurisdictions” rabbit hole. What  
2 matters here is Washington law, under which the capital gains tax is not a property tax because  
3 it is not an “absolute and unavoidable demand against property or the ownership of property”  
4 arising from the taxpayer’s “status as property owner.” *Covell*, 127 Wn.2d at 890. That ends  
5 the inquiry. *Cosro*, 107 Wn.2d at 761.

6 **3. The capital gains tax has the “hallmarks” of an excise tax**

7 Plaintiffs next argue that the capital gains tax “bears hallmarks” of an income tax,  
8 which they claim overrides the Legislature’s characterization of the tax as an excise tax.  
9 Pls.’ Mot. Summ. J. at 20-22. Plaintiffs’ argument misses the mark. Washington courts  
10 determine the true nature of a challenged tax based on how it operates in practice, not on  
11 whether it may have features in common with some other jurisdiction’s tax. Properly analyzed,  
12 the capital gains tax operates in practice as an excise tax. It is imposed on the voluntary act of  
13 selling non-exempt capital assets, and the “element of absolute and unavoidable demand, as in  
14 the case of a property tax, is lacking.” *Black*, 67 Wn.2d at 99. The tax is not on *ownership* of  
15 the capital asset, which is what makes a property tax unavoidable.

16 Plaintiffs are wrong when they contend that the capital gains tax is unlike other excise  
17 taxes enacted by the state. Pls.’ Mot. Summ. J. at 20. Like Washington’s retail sales tax upheld  
18 in *Morrow* and real estate excise tax upheld in *Mahler*, the capital gains tax is imposed on the  
19 voluntary sale of property located in the state. Further, our Supreme Court has long held that  
20 excise taxes may be measured by income generated from the activity or transaction being  
21 taxed. This principle goes back nearly 90 years, when the Court upheld the state’s first B&O  
22 tax, which was measured by the gross income generated from in-state business activity. *State*  
23 *ex rel. Stiner v. Yelle*, 174 Wash. 402, 25 P.2d 91 (1933). “[T]hat the amount of the tax is  
24 measured by the amount of . . . income in no way affects the purpose of the [tax] or the  
25 principle” that the state may tax the privilege of acquiring income from in-state business  
26 activity. *Id.* at 407.

1 Plaintiffs also go astray when they assert that the capital gains tax must be an invalid  
2 property tax simply because it is “geared” or “tethered” to definitions and concepts from the  
3 federal income tax code. Pls.’ Mot. Summ. J. at 19, 21.

4 First, the federal income tax is considered a type of excise tax, not a property tax. *See*  
5 *Hale*, 302 U.S. at 104; *see generally Graves v. People of State of N.Y. ex rel. O’Keefe*, 306  
6 U.S. 466, 480, 59 S. Ct. 595, 83 L. Ed. 927 (1939) (“The theory, which once won a qualified  
7 approval, that a tax on income is legally or economically a tax on its source, is no longer  
8 tenable . . .”). It is illogical to assert that Washington’s capital gains tax is invalid simply  
9 because it employs terminology from the federal tax code when that federal tax, under federal  
10 law, is a form of excise tax and not a property tax.

11 Second, our Supreme Court has already held that Washington’s estate tax is an excise  
12 tax, even though it, too, is tethered to federal law in a variety of ways. *Estate of Ackerley v.*  
13 *Dep’t of Revenue*, 187 Wn.2d 906, 912, 389 P.3d 583 586 (2017) (citing *Estate of Hambleton*,  
14 181 Wn.2d at 811). As one noteworthy example, Washington’s estate tax uses the “federal  
15 taxable estate” as the starting place for computing the tax. *See* RCW 83.100.020(15) (defining  
16 “Washington taxable estate” as starting with “federal taxable estate”). In both the capital gains  
17 tax and the estate tax, the Legislature had valid reasons for using federal terminology that have  
18 nothing to do with whether the tax is a property tax or an excise. As our Supreme Court  
19 explained in analyzing Washington’s estate tax, by using “federal taxable estate” as the starting  
20 point for computing the “Washington taxable estate,” the Legislature “avoided having to duplicate  
21 congressional effort involved in explaining all the possible inclusions, exemptions, and deductions  
22 necessary to reach the taxable estate, and also helped to avoid the complication and confusion that  
23 a different set of state rules might create.” *In re Estate of Bracken*, 175 Wn.2d 549, 583, 290  
24 P.3d 99 (2012) (Madsen, C.J., concurring/dissenting), superseded by statute as stated in *Estate*  
25 *of Hambleton*, 181 Wn.2d at 809. A similar benefit is achieved under the capital gains tax.  
26 Persons subject to the tax are not required to start from scratch; they can start with an amount

1 computed and reported on their federal tax return. Additionally, the Legislature avoids  
2 duplicating congressional efforts and all the “complication and confusion that a different set of  
3 state rules might create.” *Id.* This sound tax policy should not be turned into a constitutional  
4 liability.

5 Plaintiffs’ additional arguments pertaining to deductions allowed under the capital  
6 gains tax code and the distinction between individual taxpayers and corporations are all  
7 inconsequential. The Legislature has “very extensive powers to make classifications for  
8 purposes” of regulatory laws, *Sonitrol NW, Inc. v. City of Seattle*, 84 Wn.2d 588, 590, 528 P.2d  
9 474 (1974), and those powers are “greater . . . in making classifications for taxation than . . .  
10 for regulations.” *Texas Co. v. Cohn*, 8 Wn.2d 360, 375, 112 P.2d 522 (1941); *see also*  
11 *Commonwealth Title Ins. Co. v. Tacoma*, 81 Wn.2d 391, 395, 502 P.2d 1024 (1972) (“[T]he  
12 legislative power is particularly broad in the area of taxation. It is inherent in the exercise of  
13 the power to tax that a state be free to select the objects or subjects of taxation and to grant  
14 exemptions. Neither due process nor equal protection imposes upon a state any rigid rule of  
15 equality of taxation.”). The Legislature acts entirely within its proper sphere of authority when  
16 it authorizes deductions and exemptions to excise tax laws.

17 Moreover, our Supreme Court has already held that there is no constitutional problem  
18 with imposing excise taxes on certain activities or transactions while exempting others. *Supply*  
19 *Laundry Co. v. Jenner*, 178 Wash. 72, 34 P.2d 363 (1934). Importantly, *Supply Laundry*  
20 involved (among other things) an excise tax measured by wages earned by public employees  
21 while exempting wages earned by private employees. *Id.* at 78. Without dissent, the Court  
22 upheld that distinction. *Id.* at 80. As *Supply Laundry* confirms, the Legislature did not overstep  
23 its authority when it included within the capital gains excise tax a deduction for charitable  
24 contributions or when it limited the tax to individuals that have long term capital gains  
25 exceeding \$250,000.  
26

1 In sum, the capital gains tax is exactly what the Legislature says it is, an excise tax on  
2 the voluntary sale of capital assets. That the tax may use some federal terms and forms does  
3 not transform it into an income tax.

#### 4 **4. Stare decisis supports the State, not Plaintiffs**

5 While Plaintiffs assert this Court must follow controlling Supreme Court authority, they  
6 fail to address the pertinent authority that controls here. Applying the proper precedent requires  
7 ruling for the State.

8 Plaintiffs rely on the holdings in *Culliton* and *Jensen*. Pls.’ Mot. Summ. J. at 24-25.  
9 But, as discussed above, these cases are inapposite as both involved unavoidable taxes on the  
10 receipt of income during the taxable year, not taxes on the voluntary sale of property.

11 The authority that actually controls here, but that Plaintiffs never discuss, is the long  
12 line of cases from our Supreme Court upholding taxes on the voluntary sale, transfer or use of  
13 property as excise taxes. Plaintiffs’ proposed test—that looks to how other jurisdictions elect to  
14 tax capital gains—does not and cannot control over the test actually applied by our Supreme  
15 Court in *Morrow*, *Mahler*, *High Tide Seafoods*, *Hambleton*, and numerous other cases.

16 Our Supreme Court has established a clear path for deciding this case. Under  
17 controlling Washington law, the capital gains tax is an excise tax because it is not an “absolute  
18 and unavoidable demand against property or the ownership of property.” Plaintiffs ask this  
19 court to ignore applicable precedent, not to apply it. The Court should decline.

#### 20 **C. ESSB 5096 Does Not Violate Article I, Section 12**

21 Plaintiffs’ final argument theorizes that ESSB 5096 violates article I, section 12 of the  
22 state Constitution by “impermissibly tax[ing] certain persons while exempting others.”  
23 Pls.’ Mot. Summ. J. at 25. Their argument misrepresents the law and is meritless.

24 Article I, section 12 provides that “[n]o law shall be passed granting to any citizen,  
25 class of citizens, or corporation other than municipal, privileges or immunities which upon the  
26 same terms shall not equally belong to all citizens, or corporations.” The purpose of this

1 provision is “to limit the sort of favoritism [towards special interests] that ran rampant during  
2 the territorial period.” *Martinez-Cuevas v. DeRuyter Bros. Dairy, Inc.*, 196 Wn.2d 506, 514,  
3 475 P.3d 164 (2020). As described in the State’s opening brief, courts apply a two-step  
4 analysis. First, the court asks whether the law grants a “privilege” or “immunity” within the  
5 meaning of the constitution. *Schroeder v. Weighall*, 179 Wn.2d 566, 572–73, 316 P.3d 482  
6 (2014). If the answer is yes, then it asks whether there is a “reasonable ground” for granting  
7 that privilege or immunity. *Id.*

8 Here, Plaintiffs’ challenge fails at the first step: they identify no “privilege” or  
9 “immunity” protected under article I, section 12. It is well settled that “[n]ot every benefit  
10 constitutes a ‘privilege’ or ‘immunity’ for purposes of the independent article I, section 12  
11 analysis.” *Schroeder*, 179 Wn.2d at 573. Rather, “privileges” or “immunities” are only “those  
12 fundamental rights which belong to the citizens of [Washington] by reason of such  
13 citizenship.” *Grant Cnty. Fire Prot. Dist. No. 5 v. City of Moses Lake*, 150 Wn.2d 791, 813, 83  
14 P.3d 419 (2004) (quoting *State v. Vance*, 29 Wash. 435, 458, 70 P. 34 (1902)).

15 Plaintiffs seriously misrepresent the law when they claim that our Supreme Court has  
16 long held that there is a fundamental right to be exempt from taxes that “others in the state are”  
17 exempt from. Pls.’ Mot. Summ. J. at 26.<sup>6</sup> To support this proposition, Plaintiffs cite *Vance* and  
18 *Grant County*, but neither holds anything of the sort. *Vance* was a murder case, not a tax case,  
19 and in passing the Court listed as an example of fundamental rights the right to be exempt from  
20 taxes that “citizens of some other state are exempt from.” *Vance*, 29 Wash. at 458 (emphasis  
21 added). The right being described restricts taxes that arbitrarily favor out-of-state interests over  
22 similarly situated in-state interests, or vice versa.<sup>7</sup> *Grant County* simply quoted the same

23 \_\_\_\_\_  
24 <sup>6</sup> It is settled law that there is no fundamental right to be free from taxes. *See City of Seattle v. Rogers*  
25 *Clothing for Men, Inc.*, 114 Wn.2d 213, 234, 787 P.2d 39 (1990) (“Legislative bodies have extensive authority to  
26 make classifications for purposes of legislation and even broader discretion in making classifications for taxation  
than it has for regulation.”).

<sup>7</sup> *See generally Allied Stores of Ohio, Inc. v. Bowers*, 358 U.S. 522, 529, 79 S. Ct. 437, 3 L. Ed. 2d 480  
(1959) (holding no violation of Equal Protection Clause where a state tax that favored nonresidents was founded  
on reasonable distinctions and not “palpably arbitrary”).

1 language in passing. 150 Wn.2d at 813. Neither case holds or suggests that Washington  
2 residents have a fundamental right to be exempt from state taxes merely because the  
3 Legislature has enacted rational exemptions that apply to other Washington residents. Indeed,  
4 taking Plaintiffs’ argument to its logical conclusion, any state tax applicable to some residents  
5 but not others (such as the estate tax, B&O tax, or the leasehold excise tax) would implicate a  
6 “fundamental right” under the Privileges and Immunities Clause. That simply is not the law.

7       Because Plaintiffs identify no fundamental right of state citizenship implicated by  
8 ESSB 5096, their article I, section 12 challenge fails at the first step. *See Ass’n of Wash. Spirits*  
9 *& Wine Distrib. v. Wash. State Liquor Control Bd.*, 182 Wn.2d 342, 363, 340 P.3d 849 (2015)  
10 (“Because this case does not involve a constitutional privilege, we need not analyze the second  
11 prong of our article I, section 12 test . . .”).

12       Even if ESSB 5096 implicated a recognized “privilege or immunity” of state  
13 citizenship (which it does not), Plaintiffs’ article I, section 12 challenge would fail because  
14 reasonable grounds exist for the distinctions drawn therein. For example, Plaintiffs never argue  
15 that it violates article I, section 12 for the Legislature to exempt from the capital gains tax  
16 retirement accounts, or gains of less than \$250,000 annually, because these exemptions  
17 advance legitimate goals, including the Legislature’s stated purpose to “mak[e] material  
18 progress toward rebalancing the state’s tax code” to make it less regressive. *See Cohn*, 8 Wn.2d  
19 at 386–87 (listing “the equalization of the burdens of taxation” as a “lawful taxing policy of the  
20 state”); *see generally Wash. Bankers*, 198 Wn.2d at 444 (upholding tax law that “asked the  
21 wealthy few to contribute more to funding essential services and programs to the benefit of all  
22 Washingtonians”).

23       Plaintiffs’ sole claim is that the Legislature lacked reasonable grounds to impose the  
24 capital gains excise tax on *individuals* but not on corporations or other non-natural persons.

1 Pls.’ Mot. Summ. J. at 27. But they cite no relevant authority for this claim,<sup>8</sup> nor does the law  
2 support it. States have broad leeway in “making classifications and drawing lines which in  
3 their judgment produce reasonable systems of taxation.” *Lehnhausen v. Lake Shore Auto Parts*  
4 *Co.*, 410 U.S. 356, 359, 93 S. Ct. 1001, 35 L. Ed. 2d 351 (1973). “Indeed, in taxation, even  
5 more than in other fields, legislatures possess the greatest freedom in classification.” *General*  
6 *Motors Corp. v. Tracy*, 519 U.S. 278, 311, 117 S. Ct. 811, 136 L. Ed. 2d 761 (1997) (internal  
7 quotations and citation omitted). Consistent with this view, our Supreme Court has held that  
8 the Legislature “has the power to make reasonable and natural classifications for purposes of  
9 taxation, and that in the exercise of this power the legislature has very broad discretion in  
10 making such classifications.” *Hemphill v. Wash. State Tax Comm’n*, 65 Wn.2d 889, 891, 400  
11 P.2d 297 (1965). Stated another way, “[a] legislature is not bound to tax every member of a  
12 class or none.” *Id.* at 892–93 (quoting *Carmichael v. S. Coal & Coke Co.*, 301 U.S. 495, 509,  
13 57 S. Ct. 868, 81 L. Ed. 1245 (1937)). The difference between classes “need not be great” and  
14 a particular tax classification may “be permissible if it is reasonably related to some lawful  
15 taxing policy of the state, such as greater ease or economy in the administration or collection of  
16 a tax, the selection of a fruitful source of revenue with the exemption of sources less  
17 promising, or the equalization of the burdens of taxation.” *Cohn*, 8 Wn.2d at 386–87.

18 Under this principle, our Supreme Court has repeatedly rejected arguments similar to  
19 those Plaintiffs make here, i.e., that excise taxes applicable to some groups but not others  
20 violate the Constitution. *See, e.g., United Parcel Serv., Inc. v. Dep’t of Revenue*, 102 Wn.2d  
21 355, 367–69, 687 P.2d 186 (1984) (upholding exemption from use tax for vehicles carrying  
22 cargo across state lines); *Black*, 67 Wn.2d at 100–01 (upholding retail sales tax on lease of  
23 vessel as floating hotel although land-based hotels were not taxed in a similar manner);

24 <sup>8</sup> Plaintiffs cite *Comptroller of Treasury of Md. v. Wynne*, 575 U.S. 542, but the Supreme Court’s discussion  
25 of individual versus corporate income there was made in the context of holding that the dormant Commerce Clause  
26 does not treat individuals less favorably than corporations. *Id.* at 553–54. *Wynne* did not involve Washington’s  
Privileges and Immunities Clause.

1 *Hemphill*, 65 Wn.2d at 891–94 (upholding exemption of bowling from a sales tax applied to  
2 the amusement industry); *Armstrong v. State*, 61 Wn.2d 116, 119–22, 377 P.2d 409 (1962)  
3 (upholding the application of a B&O tax to general insurance agents, despite the fact that their  
4 counterparts working in insurance company branch offices were not so taxed).

5 The Legislature in ESSB 5096 addressed a genuine concern that Washington’s low and  
6 middle income families pay a disproportionate share of their incomes in taxes as compared to  
7 its wealthiest residents. Imposing a capital gains tax on those with gains beyond a quarter  
8 million dollars annually is a reasonable step toward equalizing the tax burden as between  
9 individuals. *See Cohn*, 8 Wn.2d at 386–87. That the Legislature imposed the tax upon  
10 individuals and not corporations does not violate article I, section 12. *Cf. Lehnhausen*, 410 U.S.  
11 at 362–65 (state constitutional provision subjecting corporations and similar entities, but not  
12 individuals, to ad valorem tax on personal property was within state’s wide latitude in making  
13 classifications that in its judgment produce reasonable taxation systems, and did not violate  
14 equal protection). The Court should reject Plaintiffs’ misguided claim that it does.

#### 15 IV. CONCLUSION

16 Plaintiffs have failed to meet their burden of showing beyond a reasonable doubt that  
17 the Legislature’s enactment of the capital gains excise tax is unconstitutional, so it should be  
18 upheld.
